

1. Base components, remove all plastic nuts from pole locator.

2. Insert pole locator and fasten bottom nut.

3. Insert pole into locator, and tighten top nut. Fill base with required water through filling hole.

4. Insert tensioning rods into front bottom holes.

5. Insert tensioning rods into top holes.

6. extend pole to required height ensuring it is locked into a groove.

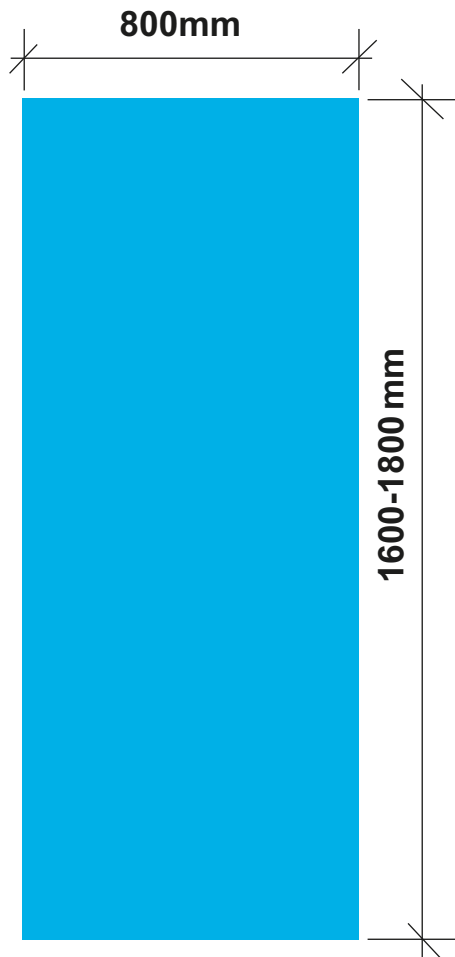

7. Attach your graphic by putting the banners eyelets through the hooks. Start with the 2 at the top, followed by the 2 bottom ones. These tensioning bars are designed to flex to keep you banner tight.

Atlanta Outdoor Banner

Graphic Guide

Width: 80cm

Graphic Dimensions

Visual Area
80x160-180cm

Banner Cut Size
90x170-190cm

Your Banner should be created with a 5cm hem all of the way around. You should use eyelets with a 15mm internal diameter. These should be positioned within the hemmed area in each corner
