

1. Stand frame as shown

2. Extend frame completely

3. Secure locking bars on both ends

4-5. Stand frame upright and swivel in direction of arrows until frame is open completely

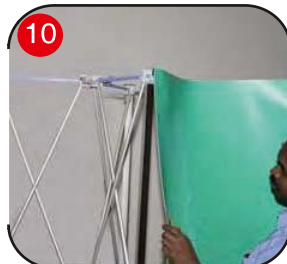

6-7. Insert attached aluminium brackets to two middle hubs to lock the frame in place.

8. Fully erected frame including brackets

9. Attach magbars (x9)

10-12. Hook graphic panel onto hookstuds and attach edge of panel to align with centre of magbar (on both edges of graphic panel). Attach remaining two panels similarly.

System Components

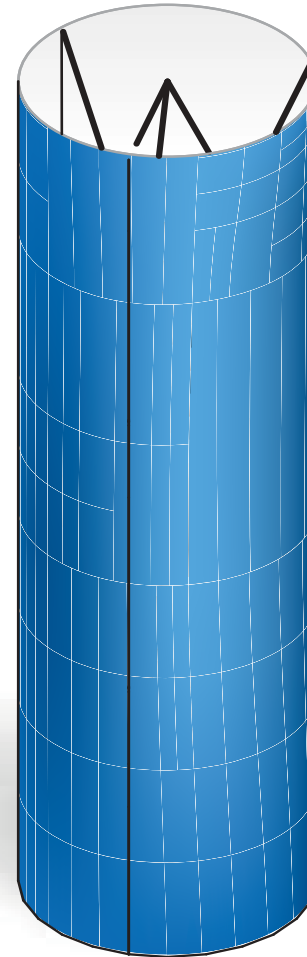

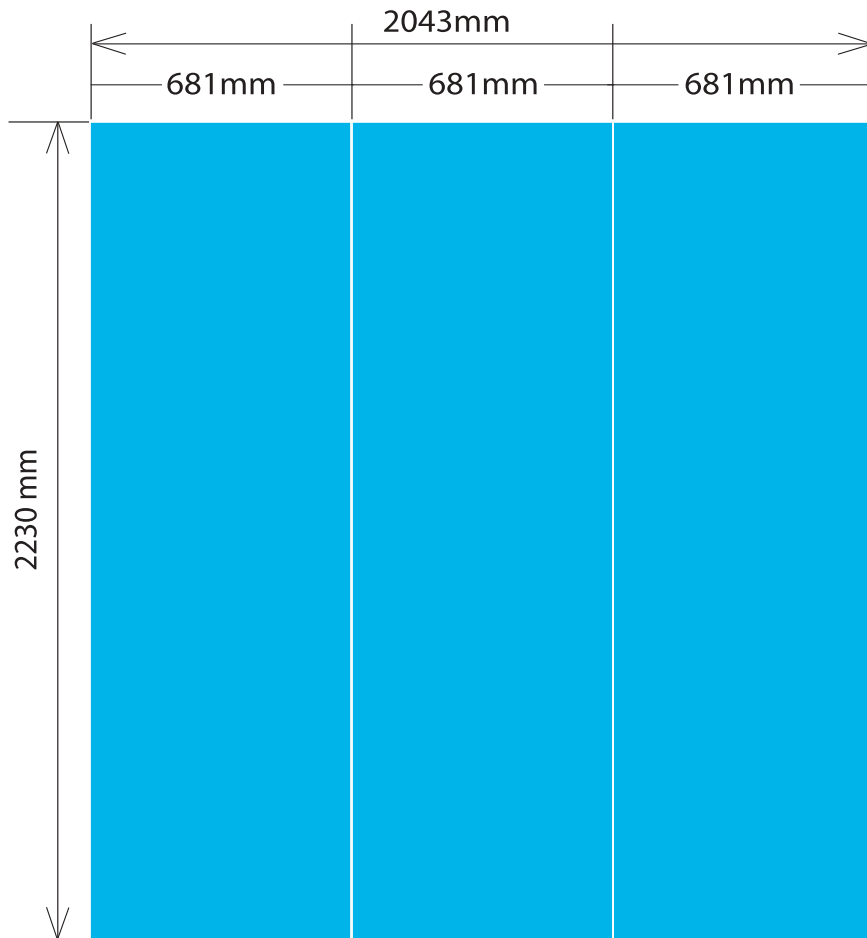

EasyTowerCircle Frame	- 1
